https://portfolio-gilangrangga.vercel.app/

Summary

Acquired the ability to evaluate the outcomes of developed solutions, demonstrating strong analytical skills and meticulous attention to detail regarding tools. Gained proficiency in using measuring instruments such as vernier calipers and micrometer screws. Learned computer programming for creating tool shapes using AutoCAD. I am a junior developer who is passionate in the field of web development. I enjoy exploring new technologies and building creative projects. Currently focused on diving into React, Tailwind CSS, and the modern JavaScript ecosystem. With the spirit of “With great power comes great responsibility”, I designed every line of code with full attention to structural neatness, visual aesthetics, and user comfort (UX)

Work Experience

Asset Maintenance Management, PT PINDO DELI PULP AND PAPER 2, karawang, Indonesia

11/2020 – 01/2021

- Executed machine maintenance and repair activities for pulp and paper production equipment.
- Performed periodic inspections, adjustments, and servicing on production machinery, including paper machines, deinking plants, and finishing equipment, to prevent sudden

breakdowns through systematic preventive maintenance.
- Troubleshoot and rapidly addressed operational issues on-site in collaboration with mechanical, electrical, and instrumentation technicians to minimize production downtime.
- Executed repairs and replacements of worn-out or damaged machine components through effective corrective maintenance.
- Championed the implementation of a strong work culture and safety protocols, including Safety and 5S initiatives.
- Applied 5S principles (Seiri, Seiton, Seiso, Seiketsu, Shitsuke) to maintain tidiness, cleanliness, and orderliness in both the workshop and respective machine areas, contributing to the company's 5-S Safety competitions.
- Identified potential hazards in the mechanical work environment and ensured all technicians utilized appropriate Personal Protective Equipment (PPE) during machine repairs, upholding Occupational Health and Safety (OHS) standards.

CREW STORE BOY, PT ALBANY CORONA LESTARI INDOMARET GROUP , KARAWANG, INDONESIA

04/2024 – 05/2026

- Full Display: Stocking and arranging products on sales shelves to ensure they remain fully stocked and neatly organized.
- Retrieving Goods from the Warehouse: Transporting new stock from the warehouse to the sales floor.
- Listing & Price Tags: Installing, checking, and updating price tags on every shelf.
- Store Cleanliness: Sweeping and mopping the interior sales area, checkout area, storefront, and parking lot. Facility Maintenance: Assisting with the maintenance of store equipment—such as freezers, air conditioning units, and generators—when necessary.
- Cheerful & Friendly Service: Greeting customers, assisting them in locating items, and promoting special offers.
- Assisting with Unloading: Helping the shift supervisor (Store Junior Leader) unload shipments from supplier vehicles or central warehouse.
- Performing Daily Routine Tasks (PJR): Carrying out routine duties according to the store's daily schedule.
- Security Monitoring: Helping to monitor the sales area to prevent potential inventory loss.
- Assisting the Cashier: Being ready to assist at the checkout area during busy periods or long queues.

WEB DEVELOPER

07/2026 – Present

- A junior developer passionate about web development. I enjoy exploring new technologies and building creative projects. Currently, I am focusing on mastering React, Tailwind CSS, and the modern JavaScript ecosystem.
- Guided by the principle "With great power comes great responsibility," I craft every line of code with meticulous attention to structural cleanliness, visual aesthetics, and user

experience (UX).

Helper produksi, PT Heinz ABC , Karawang, Indonesia

12/2022 – 11/2023

- Raw Material Preparation and Handling
- Material preparation: Retrieving, lifting, and transporting raw materials or packaging from the warehouse to the production line.
- Supporting supply continuity: Ensuring materials are available near the machines so operators do not run out of supplies while the machinery is running.
- Assisting Packaging and Production Processes
- Supporting packaging: Assisting with the packing or stacking of finished products into cartons or onto pallets.
- Preliminary checks: Helping to inspect the physical condition of packaging or products for visible defects before they are sent to the storage warehouse.
- Cleanliness and Workplace Safety
- Maintaining area cleanliness: Cleaning the work area, addressing slippery floors, or clearing raw material spills around machines to ensure hygiene (adhering to strict food industry standards).
- OHS compliance: Implementing Occupational Health and Safety (OHS) standards and wearing personal protective equipment (PPE), such as safety shoes.
- Reporting and Basic Administration
- Stock recording: Assisting in recording data on incoming and outgoing goods or daily material usage.
- Coordination: Reporting machine issues, material shortages, or product non-conformities to the foreman or supervisor.

Education

SMK TEXMACO KARAWANG, SMK TEXMACO KARAWANG, Teknik Mesin, KARAWANG, Indonesia

05/2018 – 06/2021

- Acquired the ability to evaluate the outcomes of developed solutions, demonstrating strong analytical skills and meticulous attention to detail regarding tools.
- Gained proficiency in using measuring instruments such as vernier calipers and micrometer screws.
- Learned computer programming for creating tool shapes using AutoCAD.
